Abstract

## - Identification info -

Title pleasure craft density from AIS [CIMA Foundation, 2015]

2015-02-16T08:00:00

Date type

Publication: Date identifies when the resource was issued

Presentation form Digital map: Map represented in raster or vector form

Density of pleasure vessel transits, expressed in kilometres per squared kilometre, within the spatial reference EPSG: 3035 at a 10km spatial resolution and including the INSPIRE compliant cell identifier. Transit distance was calculated from the CIMA foundations AIS dynamic point data which was recorded from an antennae located at 44.30°N and 8.45°E between May 2013 and October 2014. After an initial preparation, cleaning and filtering procedure a GIS platform was used to create line transits from the positional points for each unique vessel for each day. The length of the pleasure vessel transits were

then summed within each grid cell for total and monthly composites covering the North West Mediterranean Sea.

The data is part of the Pelagos Convention No. 01/2014 project to provide a description of the vessel traffic in order to address the impact to cetacean

species as part of the Pelagos Sanctuary MPA regulations.

Status Completed: Production of the data has been completed
Maintenance and update frequency Not planned: There are no plans to update the data

Maintenance and update frequency Not planned: There are no plans to update the data

Descriptive keywords BIO , environmental impact assessment , marine env

BIO , environmental impact assessment , marine environment , Pelagos Sanctuary , shipping , marine transportation , Automatic Identification System

(AIS), transport networks.

Use constraints Other restrictions: Limitation not listed

Spatial representation type Grid : Grid data is used to represent geographic data

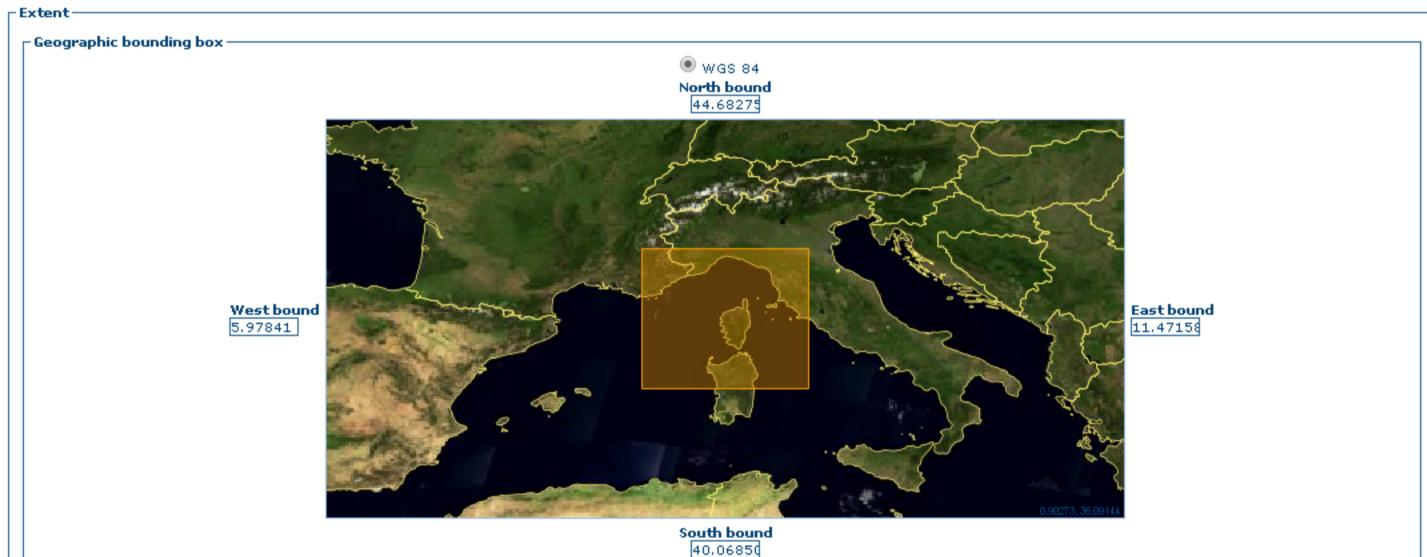

\_ Equivalent scale —

Denominator 1000000

Language English

Character set UTF8: 8-bit variable size UCS Transfer Format, based on ISO/IEC 10646

Topic category code Transportation

## Reference System Information

Code EPSG:3035

Metadata — File identifier

57f32fcc-d431-437f-9953-ddf1fc4ca10c

Metadata language English

UTF8: 8-bit variable size UCS Transfer Format, based on ISO/IEC 10646

Date stamp 2015-03-22T22:34:06 Metadata standard name ISO 19115:2003/19139

Metadata standard version 1.0
